SUMMARY

My name is Riza Anwar Fadil, a passionate and versatile developer specializing in Full-Stack Development, UI/UX Design, and Artificial Intelligence. Backend-focused developer with experience building scalable learning systems and REST APIs using Python, Node.js, and graph-based databases (Neo4j). Experienced in developing recommendation systems and user-based learning logic to support personalized education platforms. Passionate about building impactful edutech solutions.

EDUCATION

Informatics Engineering Aug 2022 - Present
Sunan Gunung Djati State Islamic University Bandung GPA: 3.92 of 4.00
Relevant Coursework : UI/UX Design, Web Development, Database Systems, Machine Learning

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, Java
Frameworks: Flask, Laravel, SpringBoot, React, Express.js
Databases: Neo4j, MySQL, PostgreSQL
Frontend: React, Next.js
Relevant Skills: REST API Development, System Design, Recommendation Systems

PROJECTS

Learning Recommendation System Jan 2026 - Present

Developed a personalized learning recommendation system using graph database (Neo4j) to model relationships between students, courses, and learning outcomes. Built RESTful APIs using Flask for adaptive recommendation delivery . Implemented logic for tracking student performance and dynamically recommending relevant learning materials. Designed scalable architecture to support future LMS integration

Project Results: <https://fe-obe-sistem-rekomendasi.vercel.app/>

Project Skilllearn Sept 2025 - Present

Developed the backend system for Skilllearn, a web-based learning platform designed to help users improve their skills through structured learning materials and mentoring features. Implemented RESTful APIs using Express.js to handle user authentication, course data management, and communication between the frontend and database. Designed scalable backend architecture, ensured efficient data processing, and supported multiple user roles within the platform to enable seamless interaction between learners and mentors. The platform aims to facilitate skill development through an accessible online learning environment.

Project Tenangin

May 2025 - Present

In the Tenangin project, I worked as a machine learning developer and frontend contributor in building an intelligent self-care ecosystem for university students. The application aims to support students' mental health through features such as self-assessment, counselor recommendations, journaling, and an interactive chatbot. I developed a stress-level prediction model based on user data and integrated it into the system, while also assisting in presenting results and interactions through an intuitive user interface.

Project Analisis Sentimen

Apr 2025 - Present

Developed a sentiment analysis project using Python and NLP libraries such as TextBlob to classify public opinions on a given topic in English. The project involved text preprocessing, sentiment visualization, and implementation of classification methods to determine whether reviews express positive, negative, or neutral sentiments.

Project Results: <https://github.com/Xinqi04/Analisis-Sentimen>

Pouchy

Jan 2025 - Present

Pouchy is a personal finance management application I developed to help users, especially women, record daily income and expenses, set monthly budgets, and distinguish between needs and wants through a simple and user-friendly interface; the app is designed with a focus on ease of use, data security, and providing financial insights to encourage healthier money management habits.

Project Results: <https://play.google.com/store/apps/details?id=com.uaspam.pouchy>

DelivYu

Nov 2024 - Present

DelivYu is a Figma design project created to streamline and enhance the delivery management process for businesses and individuals. The design prioritizes user-friendliness, efficiency, and aesthetics, ensuring an intuitive experience for users. DelivYu combines modern design principles with functionality to provide a robust solution for delivery management, emphasizing simplicity and effectiveness.

ULP (Unit Layanan Psikologi)

Jan 2024 - Present

The ULP (Psychology Service Unit) of UIN Sunan Gunung Djati Bandung provides psychological support services such as counseling, psychological tests, and mental development programs for students, lecturers, and the broader community. I designed the ULP application to ensure users can easily access information and register for services through a user-friendly and efficient interface. Key features include an informative homepage, a streamlined online registration form, and a user dashboard for tracking appointments and notifications. The responsive design ensures accessibility across both desktop and mobile devices, making psychological support more convenient and accessible for everyone.

AWARDS

Gold Medal in the International Invention Competition for Young Moslem Scientists by Indonesian Young Scientist Association (IICYMS) Aug 2024

This award was given to the Sequran team for our innovative project, a Quran search engine developed for the International Invention Competition For Young Moslem Scientists (IICYMS). The competition, organized by the Indonesian Young Scientist Association (IYSA) in collaboration with Universitas Komputer Indonesia (UNIKOM), encourages young scientists to integrate scientific and religious knowledge. Our team was recognized in the Computer Science category for creating Sequran, a tool designed to make the Quran more accessible and searchable online. This achievement underscores our commitment to combining technology and faith in impactful ways, and we are excited to continue contributing to both the tech and religious communities.

3rd Winner Hackathon IT Fair XIII by HIMATIF UIN Sunan Gunung Djati Bandung Feb 2024

This award was presented to the TechXplorers Team for successfully developing the ULP (Psychology Service Unit) application, designed to optimize the psychology service process at UIN Sunan Gunung Djati Bandung. In this project, I played a key role as part of the Research and UI/UX Design team. My contributions included conducting research to ensure the application addressed user needs effectively and designing intuitive interfaces that enhanced the overall user experience. Although I was not the team leader, my role was vital to the project's success. Through dedication and close collaboration among team members, we achieved 3rd place in the competition. This accomplishment reflects our commitment to delivering innovative solutions that positively impact society and education. We look forward to continuing our journey of innovation and contribution to the technology and education sectors.
