SUMMARY

Informatics Engineering graduate with a strong interest in Artificial Intelligence and AI Integration. Experienced in developing AI-powered applications, recommendation systems, RESTful APIs, and data-driven solutions using Python, FastAPI, Neo4j, SQL, and JavaScript. Familiar with Large Language Models (LLMs), Prompt Engineering, AI-assisted information extraction, and integrating AI components into web applications. Strong analytical and problem-solving skills demonstrated through internships, AI projects, and technology competitions.

EDUCATION

Informatics Engineering Aug 2022 - 2026
Sunan Gunung Djati State Islamic University Bandung GPA: 3.93 of 4.00
Relevant Coursework : UI/UX Design, Web Development, Machine Learning

TECHNICAL SKILLS

Programming : Python, JavaScript, PHP, Java
AI & Data : Machine Learning, Large Language Models (LLMs), Prompt Engineering, Recommendation Systems, Content-Based Filtering, Knowledge Graphs, AI Agent Fundamentals, RAG Fundamentals
Databases : Neo4j, MySQL, PostgreSQL
Backend : FastAPI, Express.js, Laravel, RESTful API, API Integration
Frontend : React, Next.js, HTML, CSS, Tailwind CSS
Tools : Git, Postman, Figma, Docker

PROJECTS

Learning Recommendation System Jan 2026 - Present

- Developed an AI-powered personalized learning recommendation system using Python, FastAPI, and Neo4j Knowledge Graph.
- Integrated Large Language Models (LLMs) with Prompt Engineering to extract and map learning concepts from educational content into the Knowledge Graph.
- Designed graph relationships between learning outcomes, concepts, assessment results, and learning materials to support personalized recommendations.
- Implemented Content-Based Filtering and similarity-based ranking to generate relevant learning material recommendations based on student performance.
- Built RESTful APIs to integrate recommendation and learning analytics services with the web application.

Project Results: <https://fe-obe-sistem-rekomendasi.vercel.app/>

Project Skillearn Sept 2025 - Present

- Developed backend services using Express.js and PostgreSQL.
- Implemented authentication and authorization features for learners and mentors.
- Designed RESTful APIs for course management and mentoring workflows.

- Optimized database queries and API performance.
- Collaborated with frontend developers to ensure seamless integration.

Project Results: <https://skillearn.vercel.app/>

Project Tenangin

May 2025 - Present

- Developed a machine learning classification model to predict student stress levels based on self-assessment and behavioral data.
- Performed data preprocessing, feature engineering, model training, and evaluation using Python.
- Designed and implemented a recommendation system to suggest nearby psychology clinics based on user needs and location.
- Contributed to frontend development and user interface implementation to improve accessibility and user experience.

Project Results: <https://frontend-tenangin.vercel.app/>

EXPERIENCE

Junior Full Stack Developer Intern — PT Kreasi Bali Sasmita

Apr 2026 – July 2026

Contributed primarily to frontend development using Laravel, Tailwind CSS, and Alpine.js, including login pages, dashboards, reusable UI components, feature integration, and bug fixing.

IT Intern – Linkup Career ID

July 2025 – Dec 2025

Supported LMS operations by managing user access, assisting with login and class access issues, and ensuring participants could access online learning sessions smoothly.

AWARDS

Gold Medal in the International Invention Competition for Young Moslem Scientists by Indonesian Young Scientist Association (IICYMS)

Aug 2025

Awarded Gold Medal in the Social Science category at IICYMS 2025 for developing Tenangin, an AI-based self-care ecosystem for student well-being. Organized by IYSA in collaboration with Universitas Komputer Indonesia (UNIKOM).

3rd Winner Hackathon IT Fair XIII by HIMATIF UIN Sunan Gunung Djati Bandung

Feb 2024

Achieved 3rd place as part of the TechXplorers Team for developing the ULP (Psychology Service Unit) application. Contributed to research and UI/UX design to improve user experience and service accessibility.

CERTIFICATIONS

[BNSP Associate Data Analyst](#)

Dec 2025 – Dec 2028

[Machine Learning Terapan](#)

Jun 2025 – Jun 2028

[Belajar Fundamental Pemrosesan Data](#)

May 2025 – May 2028

[Belajar Fundamental Deep Learning](#)

Apr 2025 – Apr 2028
